RID ID PDR 288	
Review CSMS	
Originator Ref IVV-DAI-001	
Priority 2	

Section NA   **Page** NA   **Figure Table** NA

Category Name Design-Segment-level   **Actionee** HAIS

Sub Category

Subject COTS Selections

Description of Problem or Suggestion:

Selection of all major COTS products has not yet been achieved (e.g., RDBMS (MSS); office automation tools (MSS); tools to perform file transfer, e-mail, bulletin board services (CSS); and products to support OSI transport, network, and datalink layers (ISS)). Completion of this process during the PDR-to-CDR timeframe could impact the detailed design. As stated in Section 4.1 of the CSMS Design Specification (December 1994), the determination of major COTS products is a primary goal of PDR.

Originator's Recommendation

Complete COTS selections soon and assess the impacts to the detailed design.

GSFC Response by: **GSFC Response Date**

HAIS Response by: Forman   **HAIS Schedule** 2/28/95

HAIS R. E. Armstrong   **HAIS Response Date** 3/15/95

Our PDR documentation does reflect the choice of major critical COTS products, including DCE, HP Openview (management framework), and TCP/IP protocols. The determination of COTS described in DID 304 refers to "makers buy" decisions, not the selection of a specific vendor product.
